

Brady M. Stephenson

Engineering Lead & Manager • brmstephenson@gmail.com • [LinkedIn](#) • <https://brady.ninja>

SUMMARY

- 12+ years of professional experience in front-end leaning full-stack software engineering and technical leadership.
 - Expertise in React (7+ years) and modern frontend architectures, including React, Vite, and Remix.
 - AI-Workflow Pioneer with 2+ years of experience integrating tools like Cursor and Opencode to accelerate team delivery and code quality.
 - Product-Minded Leader with a history of hiring, onboarding, and platform direction for teams serving 2,200+ active customers.
-

PROFESSIONAL EXPERIENCE

Design Pickle

January 2025 – Present

Engineering Lead & Manager

- Directed infrastructure migration from Heroku to AWS, successfully reducing annual cloud spend by over \$30k.
- Led frontend modernization and rebrand by migrating legacy Rails/React views to Remix + Vite, improving build performance by 25% and local development speed by 90%.
- Architected AI-assisted engineering workflows via Cursor and Opencode, significantly increasing iteration speed while maintaining high code quality and consistency.
- Maintained hands-on production code contributions while driving technical direction, system design, and sprint execution across 6 major platform initiatives.
- Managed and mentored a team of 3 frontend engineers, focusing on technical growth and high-standard delivery.

Design Pickle

January 2024 – December 2024

Lead Frontend Software engineer

- Owned frontend technical standards and long-term platform direction, serving as the technical lead for core product workflows and feature launches.
- Collaborated with product and design leadership to deliver roadmap features utilized by 2,200+ monthly active customers.
- Scaled the engineering team by owning frontend hiring and onboarding processes.

Design Pickle

March 2022 – December 2023

Senior Frontend software engineer

- Founding frontend engineer hired to architect and deliver a greenfield React application.
- Designed the initial frontend architecture, including the core component system, state management, and developer tooling.

Beam Dental – Columbus, OH

Software Engineer

August 2019 – April 2022

- Developed front-end views using ReactJS, Styled Components, HTML5, CSS3, and jQuery.
- Developed backend applications using Rails APIs and views.
- Built AWS Lambda functions for file parsing.
- Led team efforts to deliver projects under aggressive timelines.
- Co-organized Front-End Working Group to share trends, best practices, and demos.
- Organized a client performance working group to identify issues and define follow-up work.
