SUMMARY

Senior / Lead Software Engineer with 12+ years of experience building scalable, React-based web applications. Frontend-leaning with full-stack experience and a strong focus on frontend architecture, design systems, and performance. Seeking senior or lead roles where I can own complex UI systems and mentor engineers.

EXPERIENCE

Engineering Manager / Lead Frontend Engineer / Senior Frontend Engineer

Design Pickle

April 2022 - January 2026, Scottsdale, AZ

- Manage and mentor a team of 3 frontend engineers while remaining hands-on in production code.
- Directed transition of infrastructure from Heroku to AWS, employing Git, AWS services, and Docker to modernize deployment pipelines and achieve significant annual cost savings.
- Guided the migration of frontend infrastructure by decoupling React from Rails, introducing Remix to optimize developer workflows and modularity with React, Remix, and TypeScript.
- Led the frontend effort to update the main customer and creative UX from legacy Rails views using React and Tailwind.
- Facilitated creating a UI library through storybook for UX designers and alike to reference in later designs.
- Promoted from Senior Frontend Engineer → Lead Frontend Engineer → Engineering Manager.

Software Engineer

Beam Dental

August 2019 – April 2022, Columbus, OH

- Developed front-end views using React, Styled Components, HTML5, CSS3, and jQuery.
- Developed backend applications using Rails APIs and views.
- Built AWS Lambda functions for file parsing.
- Led team efforts to deliver projects under aggressive timelines.
- Co-organized Front-End Working Group to share trends, best practices, and demos.
- Organized a client performance working group to identify issues and define follow-up optimizations.

Senior Software Engineer/Team Lead

Insight Digital Innovations/Cardinal Solutions Group

September 2015 – August 2019, Columbus, OH

- Led and supported a development team, including career growth and delivery expectations.
- Developed front-end applications using HTML5, CSS3, JavaScript, AngularJS, Angular 2+, jQuery, and Bootstrap at client sites.
- Presented technical and non-technical topics at team meetings and internal groups.
- Co-organized meetings for an internal user interest group.
- Taught Angular at a weekend workshop for the Columbus Web Groups meetup.

Software Engineer

Tata Consultancy Services

July 2014 – September 2015, Milford, OH

- Developed IBM MobileFirst hybrid mobile applications.
- Built front-end features using HTML5, CSS3, JavaScript, AngularJS, jQuery, and Bootstrap.
- Integrated iBeacon technology for location-based messaging.
- Demoed mobile applications to clients using iBeacon technology.

Software Engineer

Ohio University

March 2013 – May 2014, Athens, OH

- Developed front-end features using HTML5, CSS3, JavaScript, AngularJS, BackboneJS, and jQuery.
- Developed, debugged, and tested Grails web applications.
- Created and maintained Oracle database queries.

EDUCATION

Bachelor's of Science in Computer Science

Ohio University • Athens, OH • May 2014

SKILLS

React, Remix, TypeScript, JavaScript, Tailwind, ShadCN, Figma, HTML5, CSS3, React Query, React Testing Library, Vitest, Jest

Ruby on Rails, SQL, REST APIs

Next.js, Angular (2+ / 1.x)

Git, Docker, Heroku, Jira
